

# Control4 4Sight Internet Services | *Your home is a click away.*

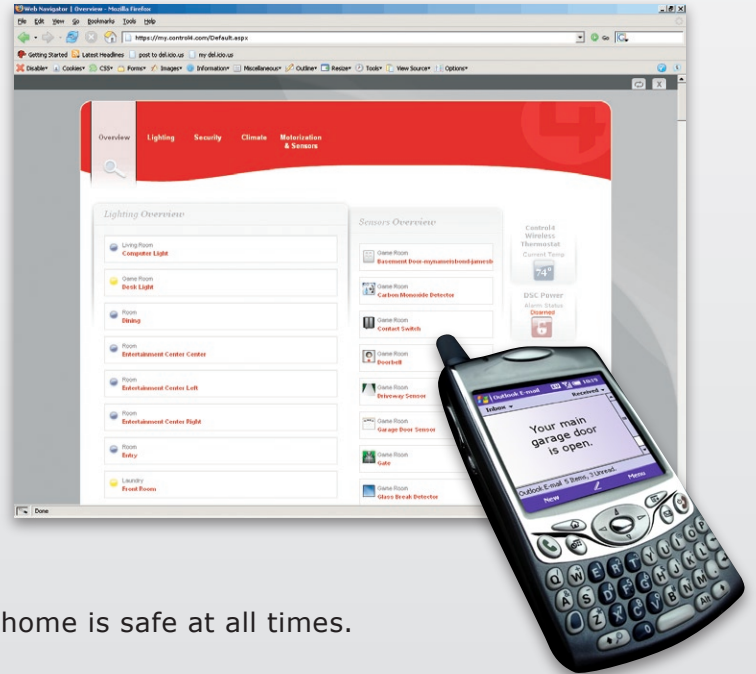

A subscription to 4Sight gives you the ability to securely monitor and control your home from any internet connection in the world. It also includes event-based email alerts for anything that happens in your home, such as the garage door being left open or the lights being left on during the day. With a subscription to 4Sight, you'll always be in touch with your home, and your home will always be in touch with you.

## Features and Benefits:

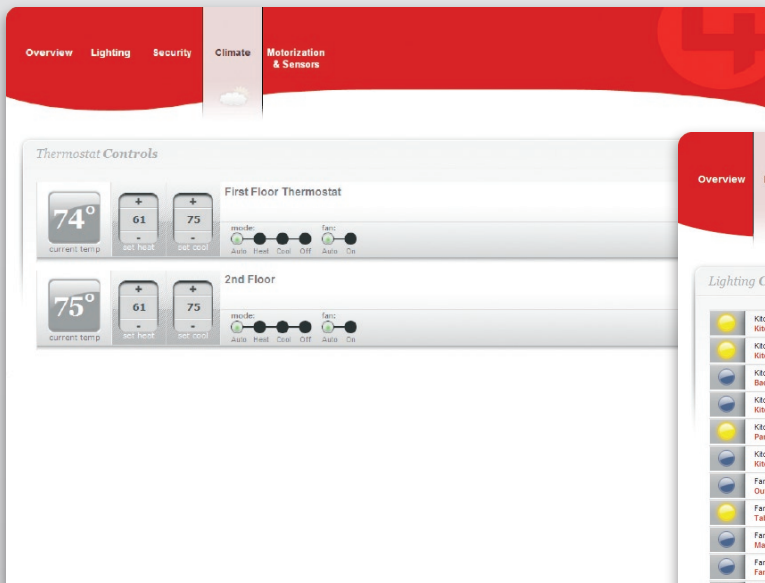

- **Email Alerts** – Email alerts keep you aware of the status of your home.
  - If the garage door is left open during the day.
  - If your security system is armed or disarmed.
  - How often the TV is turned on and off.

If there is something that you want to monitor in your home, Control4 email alerts will keep you informed.

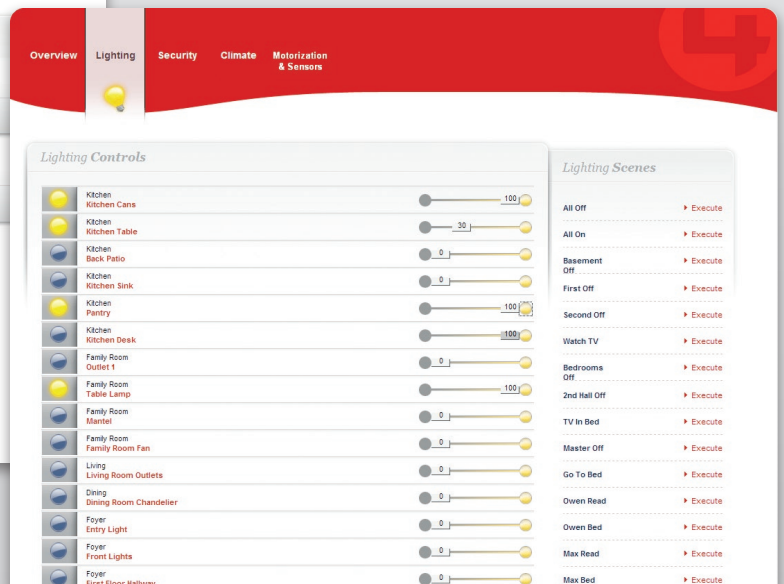

- **Web Navigator** – Login to myControl4.com to remotely monitor and control your home.
  - Turn the lights on and off.
  - Adjust the temperature before you leave home from work.
  - Check your security system status while you're on vacation.
  - Monitor doors and windows to make sure your home is safe at all times.

With a subscription to 4Sight, your home is never more than a click away.

4Sight Web Navigator – Lighting Control

## Getting Started with 4Sight Internet Services:

To start using 4Sight, please follow these simple instructions to create and account on myControl4.com and setup your Control4 system to be securely accessed from the internet.

### Step 1. Obtain a 4Sight Subscription Kit

4Sight requires a subscription code to activate the service on your Control4 system. Once you have purchased a 4Sight subscription from an authorized Control4 dealer, you will use the subscription code to activate your account and connect to your system through the internet.

### Step 2. Create a myControl4.com Account (Half Way There!)

A myControl4.com account is required to activate your subscription to 4Sight. To setup an account, simply visit <http://mycontrol4.com> and click on "System Registration" at the top of the page. On the registration page you can fill out your registration information and create an account name. This name will be used to uniquely identify your Control4 system (like naming your computer or your dog).

For this example we have created a myControl4 account called John\_Smith, (with the appropriate email address and password) and select the dealer in the drop down box that installed the system. After you submit your registration, you will automatically be taken to the "Subscription" page. Time to get out that subscription code!

On the subscription page you can enter the subscription code you purchased for your account. Once you click "Activate", your system will be enabled for 4Sight.

### Step 3. Configure Your Control4 System (You're Almost Done!)

Now that you've created an account on myControl4.com, the only thing you have left to do is to enable remote access on your Control4 system in your home. It's basically telling your Control4 system about the myControl4 account you just created. This can be done from any graphical navigator in your system, including 10.5" touch screens, mini touch screens, and the TV interface. On your navigator interface, select "Info" to get into the setup page of your system. From there, select "Remote Access" from the menu (the location will differ depending on the interface you're using).

On the remote access screen, highlight "Account Info" and enter your myControl4.com account information (that you created in the previous step). Select the text box and use the pop up keyboard to enter your information.

Next, highlight "Remote Access" from the left side of the screen (not the top). Then select "Enabled" to turn on remote access on your system. That's it!

Now you can login to your myControl4.com account to access your Control4 system through the internet. For additional information, please visit [www.myControl4.com](http://www.myControl4.com).

**Step 2 - Enter Your Control4 System Information:**

Date of Purchase \*  (MM/DD/YYYY)

Dealer of Record \*  [Who is my dealer of record?](#)

**Step 3 - Create your my.Control4.com Account:** [Account Help](#)

Account Name \*  (minimum of 6 characters)

E-mail Address \*

Confirm E-Mail \*

Password \*  (minimum of 7 characters)

Confirm Password \*

Note: Password is case sensitive and must use both letters and numbers.

I wish to receive periodic product and promotional information from Control4 via e-mail

I have read and accept the terms of the [Control4 Privacy Policy](#).

### Create a myControl4.com Account

**Profile** **Users** **Subscription**

A Control4 Internet services subscription enhances and extends the functionality of your Control4 system, enabling capabilities like Remote Access or Email Notifications. These services give you the peace of mind of an anytime, anywhere connection to your home. Internet Services subscriptions can be purchased from your authorized Control4 dealer.

**Account Subscription: None**
